FOR IMMEDIATE RELEASE

## SeaCliff Beauty Packaging & Laboratories Introduces New Dual Chamber Tubes

**SeaCliff Beauty Packaging & Laboratories** will offer their clients innovative new **Dual Chamber Tubes**, featuring a pump actuator head with two locking devices. Launching in Winter 2010, the component's overcap consists of a screw-on cap with threads, which allows the cap to secure tightly onto the tube and for the actuator to be locked in order to prevent leakage. Designed to be an option for high-end cosmetic and skincare products, the **Dual Chamber Tubes** are available in a 30 mm and 35 mm diameter, with a maximum fill capacity of 80 mL, 40 mL inner and 40 mL outer. **SeaCliff Beauty** can customize the component's formula or fill customer-supplied bulk products as well.

"We are thrilled to offer our clients this exciting new packaging option, which is ideal for products like facial primer and tinted moisturizer, of which you want to keep separated until evacuated from the chambers," says **Vonda Simon**, president of **SeaCliff Beauty Packaging & Laboratories**. "The overcap's cutting-edge design allows for maximum security, ensuring there won't be any spills--even if the customer loses the cap or opts not to use it."

**SeaCliff Beauty** requires a minimum order of 10,000 pieces for the **Dual Chamber Tubes**; decoration options including silkscreening, hotstamping and offset printing are available.

**SeaCliff Beauty Packaging & Laboratories** was founded in 1999 by Vonda Simon with the purpose of offering cutting-edge, performance-based packaging options at competitive prices for the cosmetic, skincare, healthcare and dental industries.
