SeaCliff Beauty Packaging & Laboratories Creates Packaging for New Anti-Aging Products from DEEP SKIN CARE

Celebrated Beverly Hills dermatologist Dr. Douglas Hamilton turned to **SeaCliff Beauty Packaging & Laboratories** to create customized packaging for the new **Deep Cell Activate (DCA) Restructuring Complex** and **Deep Delivery Enhancer (DDE) Absorption Powder** from his **DEEP SKIN CARE** line. Designed to be used as a set for optimal results, the two anti-aging products serve to reverse early signs of sun damage on the cellular level by halting free radicals, preventing water loss and stimulating collagen growth. The **DCA Restructuring Complex** is packaged in an airless pump, while the **DDE Absorption Powder** is packaged in a jar.

“We are thrilled to team up with such a highly regarded dermatologist to create cutting-edge components that provide perfect application with every use,” says **Vonda Simon**, president of **SeaCliff Beauty Packaging & Laboratories**. “We designed the components and packaging to reflect the cutting-edge technology and innovation behind **DEEP SKIN CARE**. When used together, the **DDE Absorption Powder** functions to increase the absorption of the **DCA Restructuring Complex**, as well as any other anti-aging products applied after.”

The **DEEP SKIN CARE DCA Restructuring Complex** and **DDE Powder** are available online at www.deepskincare.com.
